

“Your shortcut to safe,
comfortable,
economical driving”

- Comfort & Security
- Protect your Driving License
- E-Drive Limiter, Bluetooth App

Comfort and Security

Choose your speed, activate cruise control, relax and enjoy the ride.

E-Cruise is your direct route to more comfortable, safer and more economical driving without annoying speeding fines. The busy, frequent driver will quickly come to appreciate road travel optimised by E-Cruise, also on long tours with a camper, trailer, etc.

E-Cruise ensures smooth, even driving, while allowing you to accelerate at will or deactivate cruise control with a light touch of the control arm or switch. E-Cruise can also be deactivated with a light touch of the brake or clutch pedal. All the advantages of E-Cruise are yours to enjoy with no negative impact whatsoever on vehicle performance.

E-Cruise incorporates a range of practical features designed to bring an entirely new dimension to life on the road. Just lean back and enjoy the ride.

Protect Your Driving License

E-Cruise Limiter is a selectable speed limiter which ensures that the vehicle cannot exceed the chosen maximum speed.

The function is activated by pressing the Limiter button when the desired speed is reached and deactivated by pressing the Cancel button or by pressing the accelerator for a couple of seconds.

E-Cruise Memory stores two pre-set speeds which can be activated or changed by pressing the Memory button.

It really is that simple.

Under varying driving patterns (urban, highway, motorway, road works), maximum speed can be changed to suit current traffic conditions.

Protect your driving license, while at the same time reducing fuel consumption, emissions, engine wear and the risk of accidents.

Your safety, as well as that of your passengers and other motorists, is dramatically increased, with no adverse effect on your ability to overtake or accelerate through the gears as needed.

What can be combined?		Memory 1 + 2	Limiter	Cancel	Cruise functions	LED's
	EC 80 control arm	●	●	●	●	3

	OEM control arm			●	●	1*
	EC Retro control arm				●	1*
	Cruise Remote App			●	●	

* - Accessories - to be purchased separately
 ** - Function only together with a cruise control switch with standard cruise functions (ON/OFF, SET & RES)

E-Drive Limiter, Bluetooth Smartphone App

Numerous international studies document conclusively that even a modest reduction of average speed can result in substantial reductions in road accidents, material damage, personal injuries and fatalities.

In the event of an accident, a slight speed reduction will significantly limit the extent of damage and injuries.

As a responsible car owner, you can employ E-Drive Limiter to actively ensure that inexperienced drivers and others with access to your vehicle never exceed the speed limit.

The function is ingeniously simple.

Up to five mobile phones can be registered for unrestricted driving. If none of these phones is present, the vehicle is automatically limited to the pre-programmed maximum speed which can be updated with password access via smartphone. This function can be installed in most automotive brands including models with factory-installed cruise control.

E-Cruise protects your loved ones, when you can't be there to look out for them.

E-Cruise Pays for Itself

E-Cruise represents a modest investment that is quickly repaid in the form of inevitable fuel savings as a result of smoother, more even driving.

Additional important advantages include more comfortable, relaxed driving, extended engine life, reduced risk of speeding fines and accidents, as well as lower emissions.

With Limiter, fuel consumption can be cut back by up to 37%, depending on driving style and route (independent E-Cruise test conducted by Fleet Van Magazine, England). For instance, reducing speed from 130 km/h down to 110 km/h yields fuel savings of approximately 20%

All this is achieved with no compromise in vehicle performance.

E-Cruise is developed and manufactured in Denmark and meets EU standards for environmentally friendly use of fossil fuels and restriction of pollution from vehicles.

E-Cruise can be installed in all vehicles with electronic drive-by-wire throttle without leaving a trace on the vehicle.

About LP

As Denmark's leading supplier of exclusive, innovative automotive accessories, Lindgaard · Pedersen A/S also develops and manufactures advanced proprietary electronic solutions in close collaboration with selected partners.

Our goal is to make life on the road more comfortable, safer and more eco-friendly.

LP was established in 1988 and is currently active in more than 25 countries.
